GRANDER® SOLE AND EXCLUSIVE DISTRIBUTOR IN ASIA PACIFIC

For Immediate Release

AUSTRIAN WATER REVITALISATION TECHNOLOGY GRANDER® ENTERS WATER TREATMENT MARKET IN HONG KONG

(31st MARCH 2016, *Hong Kong/Asia*) Full Comfort Technology (Group) Limited – the sole and exclusive distributor of GRANDER® Technology in Asia Pacific – is representing GRANDER WASSERBELEBUNG – IPF GmbH to participate in the **BUILDTEX 2016**, to promote GRANDER® Water Revitalisation Technology from Austria. During **May 4-6th 2016** at **Hall 1C/Booth 1C-417 of HKCEC**, industry experts can learn about how GRANDER® is able to help enhance the water quality in Hong Kong with a **permanent and sustainable solution** that is **chemical-free, electricity-free and replacement-free**.

On **Thursday May 5th 3pm-3:45pm**, Dr. Tat-Chee Tam, President of Full Comfort Technology (Group) Limited, will present the latest laboratory findings on GRANDER® Technology against **bacteria and lead contamination** to interested parties at **Seminar Room B, Hall 1B, HKCEC**.

GRANDER® Water Revitalisation: In use around the globe

From Europe to Canada and South America, from Asia to New Zealand, GRANDER® Water Revitalisation is used in 700+ three-Star to five-Star hotels in Europe, and more than 300,000 user testimonials worldwide. The vast areas of application of GRANDER® Water Revitalisation Technology includes: hotels & resorts, F&B, agriculture, bakery & food production, residential & commercial buildings, industrial manufacturing factories as well as individual households. A small excerpt:

- Island Shangri-La Hotel, Hong Kong/China
- Guangyong Lido Hotel, Guangzhou/China
- United Service Recreational Club, Hong Kong/China
- Tipco Tower, Bangkok/Thailand
- InterContinental Koh Samui, Thailand
- The International Hotel of Calgary, Canada
- Marriot Frankfurt, Frankfurt/Germany
- Vienna Airport, Austria

GRANDER® Water Revitalisation: Authentic Technology from Austria

The term 'water revitalisation' has become more popular in the water treatment industry nowadays. In fact, **Mr. Johann Grander**, founder of Austrian GRANDER® Water Revitalisation Technology, was the one who gave name to this process after being able to determine constant changes in the behaviour of micro-organisms under the microscope, as soon as water is treated by his method back in the 1980s.

The particular strength of GRANDER® Water Revitalisation lies in **stabilizing microbiology**. The application of GRANDER® technology results in the following advantages for food and beverages users:

- **Reduction in bad odour, sludge build-up, microbial contamination** in water tanks and pipeworks
- **Extend lifespan of equipments**, coolers/boilers, etc
- **Reduction of lead toxicity up to 70%** (laboratory test by Vitargent in 2015)
- **Enhance natural self-cleansing effects of water**
- **Savings in chemicals, energy and water usage**, hence more **environmentally-friendly**
- **Savings in maintenance, bottle water transportation & operation costs**
